DETAILED ACTION

Allowable Subject Matter

1. Claims 23, 26-29, 31, 33-35 objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Double Patenting

2. Claims 22, 24, 25, 30 and 32 provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1, 10 and 11 of copending Application No. 10/380,933. Although the conflicting claims are not identical, they are not patentably distinct from each other because they both claim a semiconductor base comprising a substrate and a semiconductor crystal grown by vapor phase growth on the substrate where the substrate has a crystal growth plane having a concavo-convex surface and the semiconductor crystal has been grown from the concave and/or convex part, where the semiconductor substrate is a crystal structure comprising A-plane, C-plane, or R-plane, (6H, 4H, 3C) GaN.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.
